BEFORE OPERATING THIS MACHINE, PLEASE READ THESE INSTRUCTIONS CAREFULLY

OPERATION

2.1 Start up machine,

2.1.1 Run out of residual fuel inside Carburetor,

2.1.2 Pull up Oil Valve (Open)

Push down Oil Valve (Close), use left hand pump machine while right hand finger press down ignition button, pump machine slowly, regularly,

2.1.3 Start Up Machine

Use left hand pump machine while right hand finger press down ignition button, pump machine slowly, regularly, when heard explode sounds, pump a little bit quickly until start up machine, then, stop pump machine and release the ignition button

2.2 Spraying fog

2.2.1 Start spraying fog

After machine start up for 20 seconds until machine work stably, turn chemicals valve to "ON" position, start spraying fog.

2.2.2 Adjust flow rate,

Turn to left direction, increase flow rate; Turn to right direction, decrease flow rate.

2.2.3 Clean solution

Before stop spray fog, firstly turn chemicals valve to "CLEAN" position run out of residual chemicals solution. 2.2.3 Clean solution

2.2.4 Stop spray fog

Wait fog disappeared, turn chemicals valve to "OFF" position.

2.3 Stop machine

2.3.1 Push down Oil Valve (Close)

2.3.2 Open chemicals tanks lid, release residual pressure.

3.1.6 As photo showed, place the diaphragm on the diaphragm fixed plate.

3.1.7 As photo showed, make the valve plate point to the groove of the diaphragm fixed plate, put onto it, makes sure the diaphragm could move freely inside the groove.

3.1.8 Keep the valve plate at UP position, install the fixed nut.

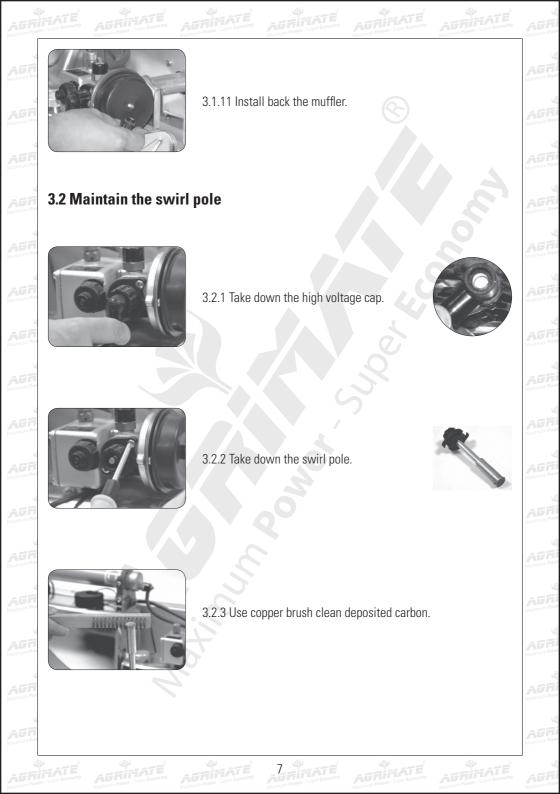

3.1.9 Watch whether the diaphragm could move freely inside the groove of the diaphragm fixed plate, do not install it too tightly.

3.1.10 Install the valve plate set back to the carburetor in appropriately, do not miss the valve plate gasket.

3.2.8 Install back high voltage cap.

4. TROUBLE SHOOTING

AGRIFIATE

AUTIMATE

AGRIMATE

AGRIFIATE

AGRIFIATE

4.1 Do not have ignition sounds.

AGRIFIATE

AUTIMATE

Problem phenomenon	Reason	Solution
Proce down ignition	Battery no electricity	Change new battery(Check chapter No.5.2)
Press down ignition button, no ignition	Battery polarity is wrong	Correct
sounds like	Battery button is broken	Change or repair
"Ta, Ta, Ta…"	Igniter is broken	Change
	Wrongly install swirl pole	Correct, (Check chapter No.3.2)
Battery button is ok, no	Electric wire welding spot is loose	Fix it
ignition sounds like "Ta, Ta, Ta…"	Low battery electricity	Change
	Swirl pole is stained	Clean, (Check chapter No.3.2)

4.2 Ignition is ok, could not start up

Problem phenomenon	Reason	Solution	
	Adjust knob locate at weak position	Turn Adjust knob to left direction a little bit for increase power (Check chapter No.5.5)	
Carburetor no fuel or no	Air pressure leaking from one-way valve of air pump	Fix it, (Check chapter No.5.3)	
fuel go into Carburetor	Air pressure leaking from fuel tank lid gasket	Fix it or change new gasket	
	Fuel tank pipeline or filter is blocked	Clean and get through it	
	Carburetor nozzle is blocked	Clean and get through it	
Too much fuel inside carburetor	Adjust knob locate at weak position	Turn Adjust knob to right directior a little bit for decrease (Check chapter No.5.5)	
	Pump too quickly or after pump many times, do not start up machine, press too much fuel go inside carburetor	Push down Oil Valve (Close), clear the diaphragm, check chapter No.3.1, keep close oil valve, pump machine while press down the igniter button, after heard explode sounds, pull up oil valve, pump machine start up machine	

10

AUTIMATE

4.3 Machine work not stably

Problem phenomenon	Reason	Solution
	Too few fuel inside fuel tank	Add fuel
Power too weak or not stably	Adjust knob not located at appropriate position	Adjust
	Have water inside fuel tank	Change fuel
	Too much deposited carbon nearby fogging tube nozzle	Clean deposited carbon
Fresh air could not get through carburetor	The diaphragm is stained, broken or do not install it in appropriately	Maintain the diaphragm, please check chapter No.3.1

AGRIFIATE

AGRIMATE

AGRIFIATE

4.4 When working, suddenly stop

Problem phenomenon	Problem phenomenon Reason		phenomenon Reason Solution	
No fuel	Run out of fuel inside fuel tank	Add fuel		
Supply too much or too few fuel	Adjust knob not locate at appropriate position	Adjust		
Air pressure from carburetor	Gasket or one-way valve gasket broken	Change		
Fresh air could not get through carburetor or diaphragm could move freely	Diaphragm broken	Change diaphragm, check chapter No.3.1		

4.5 Too few fog or machine only spray a little fog

Problem phenomenon	Reason	Solution
	Air pressure leak from chemicals tank lid	Tighten or change new gasket
No pressure inside chemicals tank	One-way valve does not work	Change gasket or O-Ring, check chapter No.5.7
	Chemicals tank screw blocked	Get through it, check chapter No.5.8
Chemicals valve gasket blocked	Chemicals valve gasket broken	Change
Chemicals pipe air pressure leak	Screw is loose	Tighten it
Fogging tube nozzle is loose	Nozzle hole is blocked	Clean or change

4.6 Spraying fog amount reduced obviously

Problem phenomenon Reason		Solution
Power decreased	Too much deposited carbon nearby fogging tube	Clean, check chapter No.3.4
Air pressure is not enough inside chemicals tank	One-way valve does not work	Change gasket or O-Ring, check chapter No.5.7
	Chemicals tank screw blocked	Get through it, check chapter No.5.8
Chemicals valve blocked	Have dirty sediment inside chemicals valve	Clean
Air pressure from chemicals valve	Screw loose	Tighten
	Chemicals valve gasket broken	Change

AGRIMATE

AGRIFIATE

4.7 While spraying fog, suddenly spray fire

Problem phenomenon	Reason	Solution
	Machine too hot	Stop for 20 minutes, then, start up machine continue spray fog
While spraying fog, suddenly spray fire	Adjust knob locate at too strong position	Decrease, check chapter No.5.5
	Spray too few fog	Increase flow rate or stop machine change bigger diameter nozzle.

5. TROUBLE SHOOTING DOCUMENTS

5.1.1 Take down high voltage cap put down on carburetor as photos showed, then press down ignition button

AGRIFIAT

AGRANTE aximum Power - Super Economy

AGRIANTE AUTONION Power - Super Economy

12 A Super Econom

AGRIATE

5.3.2 Check whether the cap is broken or air pressure, if has please change it.

5.3.3 Check whether the gasket or O-Ring is broken, deform? The photo shows it is ok.

5.3.4 The photo shows it is deformed, no ok

5.3.5 Install back in appropriately, do not install it too tightly, if the air pressure could not get through will have problem.

5.4 Check fuel tank

5.4.1 Open fuel tank lid, if do not have enough fuel, please add fuel.

5.4.2 Check O-Ring, if it is broken or deformed, please change it, when install back fuel tank lid to fuel tank, please do not install it too tightly.

14 **.................................**

Adjust knob locate at "0" for standard position to start up machine.

Turn to left direction, increase power.

Turn to right direction, decrease power.

Please pay attention: New machine have been fixed at standard position, please do not doing adjustment before operation.

Standard position

- Scale on adjust knob, for each adjustment, please do not exceed more than 1 scale.

Adjust standard position, Left hand finger hold scale knob, right hand finger use screw to adjust the screw inside the scale knob, Adjust to left direction for increase power, Adjust to right direction for decrease power,

Please pay attention:

Only when adjust the adjust knob to maximal or minimum position, if still not meet appropriately operation requirement, could doing this adjustment;

Otherwise, forbid to doing this adjustment, in avoid of cause the adjust knob locate at in appropriate position, untrained customer could not fix the problem.

15

5.6 Check air pressure of chemicals tank

When machine working, open chemicals tank lid, put hand on it to feel whether inside have air pressure.

5.7.1 Check whether the cap is broken, if has, change new cap.

5.7.2 Check whether the gasket is broken or deformed, if has, change, the photo showed is ok.

5.7.3 The photos showed the gasket position is not ok.

5.7.4 When install back the one-way valve, please do not install it too tightly, otherwise if the air pressure could not get through will have problem.

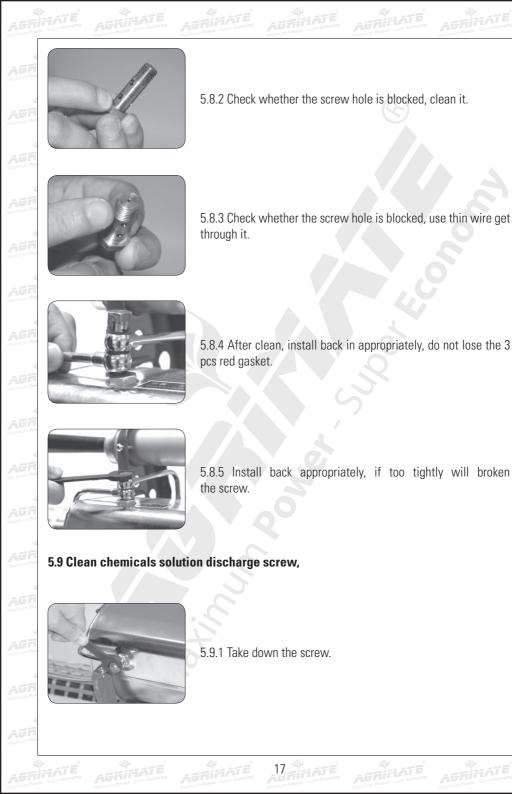

5.8 Clean chemicals tank screw

If the chemicals tank screw is blocked, carburetor could not supply air pressure to chemicals tank, it will affect spraying fog.

5.8.1 Take down the screw, keep well the red copper gasket, do not lose it.

5.9.2 Check the filter for clean it.

5.9.3 Install back appropriately, if too tightly will broken the screw.

6. OPERATION SKILL

6.1 Correct operation procedure,

- > Make sure close chemicals valve.
- > Start up machine.
- > Open chemicals valve.

> Finish spraying.

- > Close chemicals valve. >
- > Stop machine.

6.2 If the operation procedure is not right, if firstly stop machine before close chemicals valve, machine will spray fire.

6.3 Please pay attention,

6.3.1 Tight chemicals tank and fuel tank lid,

6.3.2 While pump machine, remember press down ignition button,

6.3.3 Please must firstly close chemicals valve, then stop machine (Push down oil valve),

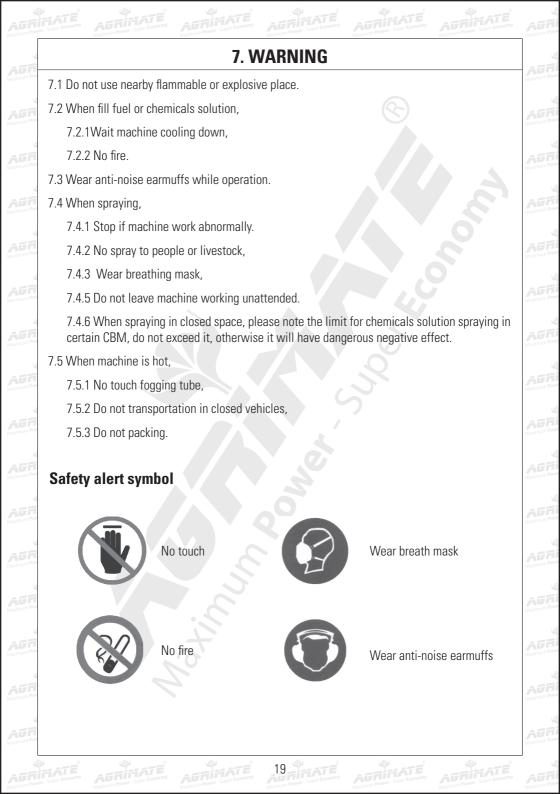

6.3.4 Do not add maximal capacity of the chemicals or fuel tank,

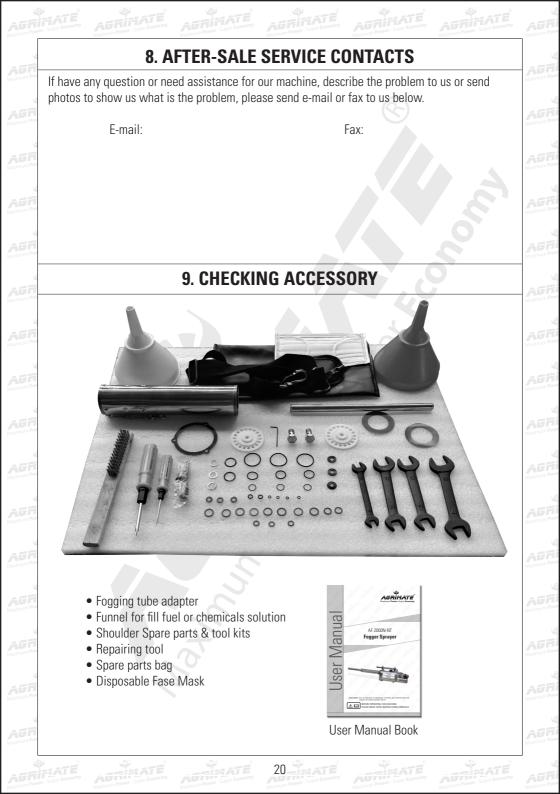

6.3.5 After spraying, discharge residual chemicals solution from chemicals tank, then add a few clean water to clean it, start up machine, spray water to clean inside chemicals pipeline and chemicals valve.

6.3.6 If long time do not use machine, take out battery, keep well all spare parts inside tool kit into packing box.

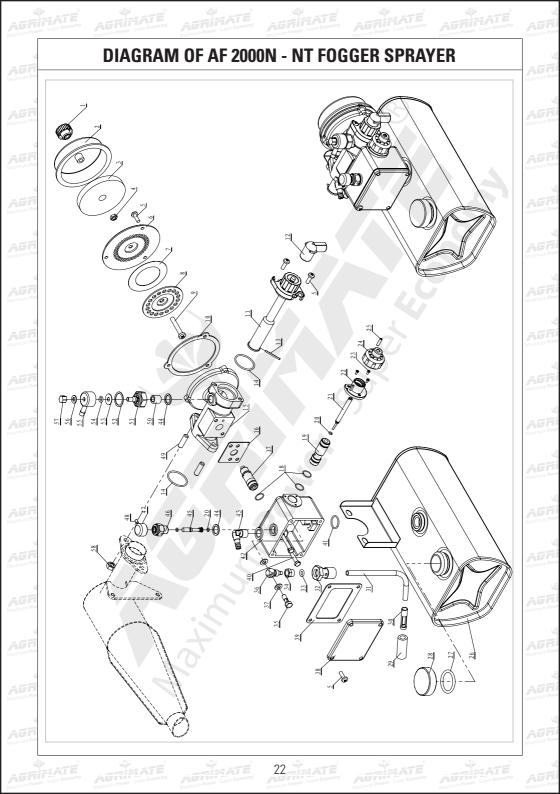

6.3.7 After use soft cloth wipe machine for cleaning, discharge residual fuel into special container, tighten it for avoid fuel evaporation.

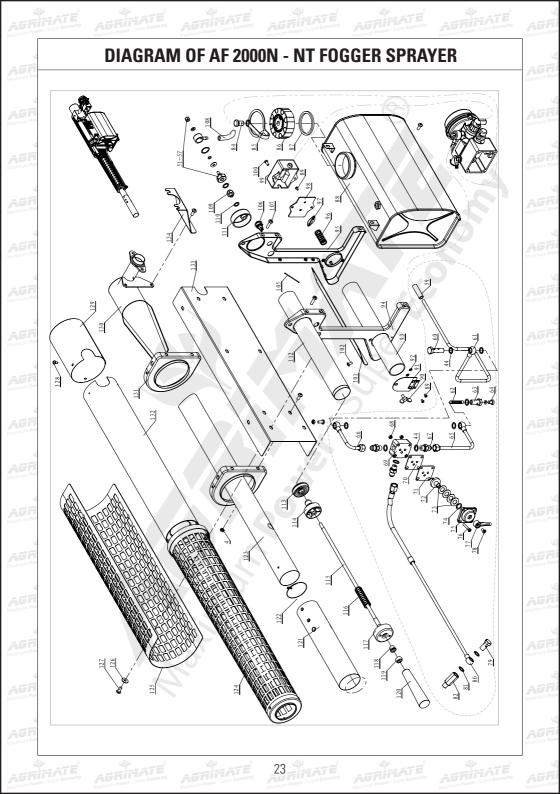

6.3.8 When found difficult start up machine or not working powerfully, clean deposited carbon nearby fogging nozzle of the fogging tube, swirl pole.

INSPECTION & MAINTENANCE

For safety use, make sure the machine is cleaned every three-months. Before working, make sure to inspect the filter and the nozzle, and ensure there is no impurity. After working, make sure there is no water in the pump and the hose.

If the machine needs to be repaired in the guarantee period, please return the machine to the shop. You need to provide the certificate of purchase in order to repair or get the substitute.

Before Packing, the machine should be cleaned, then use closed packaging, packaging should be firm. Store the machine in dry place.

For transportation safety. The machine should comply with ISTA.

Meaning of crossed - out wheeled dustbin:

Do not dispose of electrical machines as unsorted municipal waste, use separate collection facilities.

If electrical machines are disposed of in landfills or dumps, hazardous substances can leak into the groundwater and get into the food chain, damaging your health and well-being.

When replacing old machines with new ones, the retailer is legally obligated to take back your old machine for disposals at least free of charge.

Do's Don'ts

- Always read the instruction manual supplied along with the equipments and understand the correct installation and operating procedures before attempting to use the equipments.
- It is important to use the personal protection equipments such as head helmet with visor, ear defenders, goggles, safety gloves, cut resistant shoes, trousers and jackets while operating potentially dangerous machines.
- Avoid untrained persons using the equipments. Children must not be allowed to handle these equipments.
- Always use genuine spares and accessories in repairs and usage to derive maximum life of the equipments.
- Always keep the equipments in good working condition to minimize loss of output as well as to reduce the pollution and save the environment.
- Do not use the machine within range of persons unless they wear protective clothing.
- Do not operate the machine when fatigued or under the influence of alcohol or drugs.
- To reduce the risk of injury, close supervision is necessary when a machine is used near children. Tea Harvester shall not be used by children or untrained person.
